

# Subject Index to Volume 32

## A

A71623, behavioral effects, food intake and activity, R125  
Acarbose, food intake, digestion efficiency and, R852  
Acetylcholine  
  loci and roles of, temperature regulation (goldfish), R596  
  vasopressin release and, sex differences, R1030  
Acid-base balance  
  blood sampling, stress due to routine handling (bird), R775  
  lactate production, muscle acidity and, exhaustive exercise, R891  
  luminal pH, distal tubule (amphibian), R1254  
Acrophase, shift of, feeding rhythms, obesity progression and, R1169  
ACTH: see Adrenocorticotropin  
Adenosine monophosphate, cyclic  
  control in adipose tissue, ectotherm vertebrates, R857  
  ion transport, mantle epithelium (clam), R76  
Adenosine triphosphate, turnover, forced dive effects, R1309  
Adenyl cyclase, adrenergic regulation, brown fat, neonate, R34  
Adipocytes  
  brown  
    norepinephrine-stimulated protein synthesis, R1003  
    proliferation, sympathetic innervation and, R1176  
Adipose tissue  
  brown: *see* Brown fat  
  cellularity, reversal of high-fat diet-induced obesity, female, R790  
  linoleic acid-enriched triacylglycerols, retention during fasting, R233  
  lipolysis  
    control, ectotherm vertebrates, R857  
    diet-induced obesity and, female, R1248  
Adrenalectomy  
  endotoxin-induced fever, glucocorticoids and, R423  
  intestinal anastomoses after, healing with corticosterone, R164  
Adrenal gland, corticosteroid secretion, fetus (sheep), R936  
Adrenal medulla, activation, catecholamines, R716  
Adrenocorticotropin  
  adrenal, secretion, fetus (sheep), R936  
  aldosterone secretion, interleukin-1 stimulation of, R840  
  extrapituitary secretion, prostaglandin E<sub>2</sub> and, fetus (sheep), R136  
  hypovolemic shock and, head-up tilt, R156  
  secretion, right heart receptor control of, R1071  
  vasopressin and angiotensin II control of, water deprivation effects, R762  
  vasopressin responses and, response to hypoglycemia, awake state, R382

## Afferents

  renal, input to ventrolateral medulla, R412  
  sensory, capsaicin-sensitive, body temperature and, R1215

## Aging

  changes induced by, zinc metabolism, R1162  
  entrainment and resynchronization with, circadian locomotor activity, R1099  
  feedback effects and, activity-rest cycle of circadian clock, R981  
  orthostatic stress and, circulatory control during, R1147  
  response to hypoxia, fetus (sheep), R880  
Alanine-proline pathway, gill (mussel), R226

Albumin, transport, blood-tissue, ANP infusion effects, R945

## Aldosterone

  ANP and angiotensin II, interactions, awake state, R537  
  ANP with, exercise in hypobaric conditions and, R647  
  dopamine receptors and, fetus (sheep), R868  
  secretion, interleukin-1 stimulation of, R840

Altitude, adaptation, cerebral blood flow and tissue oxygenation in (geese), R221

## Amiloride

  short-circuit current stimulated by, calcium channel blocker effects, tadpole skin (frog), R827  
  sodium uptake sensitive to, ANP effects, brain, R279

## Amino acids

  excitatory, parabrachial nucleus, R324  
  hemodynamic responses to, endothelium-derived nitric oxide effects, R510  
  imbalance, clonidine and, prepyriform cortex, R885  
  nutrient transport mechanisms, intestines, R458, R472  
  PAF effects, traumatic brain injury, R909

Ammonia, inflammation mediated by, hyperosmolality effects, renal medulla, R148

Anaphylaxis, pulmonary vascular response to, lung, R1024

ANF: *see* Atrial natriuretic factor

## Angiotensin

  central, hemodynamic effects, awake state, R845  
  centrally infused, baroreceptor reflex modulation by, R89  
  salt appetite induced by, oxytocin effects, R1347

## Angiotensin II

  concentrations, interactions of, awake state, R537  
  reflex regulation and  
    ACTH, glucocorticoids, and renin, R762  
    heart rate, R756

renal nerve activity and, spontaneous hypertension, R109  
  vasopressin release and, sex differences, R1030

## Anorexia

  dehydration, sodium chloride inhibition of gastric motility, R9  
  induction, TNF- $\beta$ , R703, R708

## Anoxia

  cerebral, tolerance (turtle), R1298  
  membrane and synaptic activity during, cerebellum (turtle), R1057  
  recovery and, catecholamines and corticosterone during (turtle), R770

ANP: *see* Atrial natriuretic peptide

Antidiuretic hormone: *see also* Vasopressin  
  central control of, sex differences, R1030  
Antioxidant enzymes, glutathione oxidation in blood, exhaustive exercise, R992

Antipyretics, TNF- $\alpha$ , interleukin-1 $\beta$  and LPS fever, R987

Area postrema, ANF binding sites, autoradiographic study, R747

L-Arginine, endothelium-derived, hemodynamic response to amino acids and, R510

ATP: *see* Adenosine triphosphate

Atrial natriuretic factor  
  binding sites, area postrema, R747  
  blood pressure control, brain, R301  
  hormone secretion, right heart receptors and, R1071

  response, hypoxia and hemorrhage, R664

Atrial natriuretic peptides  
  amiloride-sensitive sodium uptake and, brain, R279

  concentrations, interactions of, awake state, R537

  physiological concentrations of, renin release and, awake state, R529

  secretion, physical exercise in hypobaric conditions, R647

  tissue-specific effects, blood-tissue albumin transport, R945

  vasopressin metabolism and, kidney, R273

  volume depletion mediated by, renal responses and, R1303

Atrial natriuretic peptide-like substance, release, dexamethasone effects, cardiocytes (trout), R447

Atriopeptin: *see* Atrial natriuretic peptide

Autonomic nervous system  
  circulatory control, during orthostasis, aging effects, R1147  
  intragastric copper sulfate effects (ferret), R284

## Autoradiography

  ANF binding sites, area postrema, R747  
  sympathetic innervation, brown adipocyte proliferation and, R1176

## Awake state

  ANP and angiotensin II concentrations, interactions, R537

  central angiotensin, hemodynamic effects of, R845

  renin release, ANP effects, R529

**B**

**Bacterial infection**  
cortisone effects, sleep, R1339  
fever, vasopressin role in regulation of, R1235

**Benzodiazepines**, aging alterations, activity-rest cycle of circadian clock, R981

**Benzolamide**, luminal pH, distal tubule (amphibian), R1254

**Betaine**, transport, gill (mussel), R226

**Bile**, neutral lipid assimilation and (bird), R389

**Bile salts**, wax ester assimilation, intestinal, R464

**Biomineralization**, mantle epithelium (clam), R76

**Blockade**, ganglionic, vasopressin and exercise pressor reflexes, R1104

**Blood**  
conductance, oxygen transfer, digital image analysis (shark), R741  
glutathione oxidation, exhaustive exercise and, R992  
oxygen content, catecholamine relations, during hypoxia (trout, eel), R240  
sampling, stress due to routine handling (bird), R775

**Blood-brain barrier**, iron uptake, transferrin degradation relations, R924

**Blood flow**: *see also Circulation;*  
**Microcirculation**  
cerebral  
nitric oxide effects, R1156  
periodic intracranial hypertension, fetus (sheep), R95  
tissue oxygenation and, during hypobaric (geese), R221  
vasopressin and, fetus, R376

determination, microsphere and dilution techniques for, R728

papillary, interstitial diltiazem infusion and, R1064

renal  
ANP effects on renin release, awake state, R529  
periodic intracranial hypertension, fetus (sheep), R95  
uterine, fetal growth retardation, R578

**Blood pressure**: *see also Pressure*  
ANP effects on renin release, awake state, R529

ANP-mediated volume depletion and, R1303

arterial, during diving, baroreflex control (duck), R693

baroreceptor discharge, suppression by endothelin, R103

cardiac reflexes and, development of (frog), R602

central angiotensin and, awake state, R845

control, nucleus tractus solitarius and, in sinoaortic denervation, R258

hormone secretion, right atrial receptor control of, R1071

input to A1 neurons projecting into supraoptic nucleus, R310

reflex regulation of, vasopressin and angiotensin II in, R756

response, hypoxia and hemorrhage, R664

response to hypoxia, fetus (sheep), R880

urinary output relations, pregnancy (sheep), R1141

**Body**

composition, underfeeding and, normal-weight young men, R251  
weight: *see Weight*

**Bombesin**, satiety induced by, mediation by luminal somatostatin, R84

**Bone**, formation, phosphorus deficiency and (cattle), R656

**Bradycardia**  
control during diving, baroreflex and (duck), R693  
diving, nasal water flow and, R1049

**Bradykinin**, biological activity, purification and (alligator), R400

**Brain**  
amiloride-sensitive sodium uptake, ANP effects, R279  
blood flow: *see Blood flow, cerebral*  
delayed firing rate response, temperature, R679

iron uptake, transferrin degradation relations, R924

neural networks in, thermosensitive, R670

traumatic injury, platelet-activating factor antagonists and, R909

**Brain natriuretic peptide**, atrial granule localization, release into circulation, R301

**Brain stem**  
ANF binding sites, autoradiographic study, R747

input to parabrachial neurons, excitatory amino acid mediation, R324

nucleus tractus solitarius, chemoreceptor input to, R368

**Breathing**: *see Respiration*

**Brown fat**  
adrenyl cyclase activity, sympathetic control of, neonate, R34

glucose transport system, ventromedial hypothalamic stimulation effects, R1228

protein synthesis, norepinephrine-stimulated, R1003

sympathetic innervation effects, R1176

thermogenic responses, strain differences in rats, R59

**Brush-border membrane**  
intestinal  
nutrient transport, R458, R472

nutrient transport during ontogeny, vertebrates, R503

sodium-D-glucose cotransport kinetics in (teleost), R1018

**Bumetanide**, inhibition of sodium transport, intrarenal pressure during, R1182

**C**

**Cachectin**, systemic injection, interleukin-1 $\beta$  and LPS fever, R987

**Calcitonin gene-related peptide**, baroreflex and, heart rate and renal sympathetic nerve activity, R874

**Calcium**  
cell volume regulation and, proximal tubule cells, R1086

intracellular, cerebral anoxia tolerance (turtle), R1298

**Calcium channel blockers**, diverse effects, glucose transport, skeletal muscle, R70

**Calcium currents**, L-type, temperature dependence of myocytes (guinea pig, squirrel), R177

**Calcium ions**  
hepatocellular alterations related to, intra-abdominal sepsis, R553

transport, placenta, gestational changes, R930

**Calorimetry**  
indirect  
determining energy expenditure in preterm infant, R685

metabolic responses to forced dives (duck), R1309

**cAMP**: *see Adenosine monophosphate, cyclic*

**Capsaicin**, CCK reduction of body temperature and, R1215

**Carbachol**, vasopressin release and, sex differences, R1030

**Carbohydrates**  
metabolism  
endotoxin effects, granulocyte colony-stimulating factor and, R1122

sepsis- and endotoxin-induced increase in, R1324

whole animal and tissue, estrogen effects (trout), R1241

**Carbon dioxide**, production, ambient temperature and hypoxia effects, newborn, R267

**Cardiac output**  
control during diving, baroreflex and (duck), R693

determination, microsphere and dilution techniques for, R728

**Cardiocytes**: *see also Myocytes*

ANP-like substance release, dexamethasone effects (trout), R447

**Cardiovascular injury**, inflammatory cytokines, magnesium deficiency and, R734

**Carotid body**, chemoreceptors, input to nucleus tractus solitarius, R368

**Catecholamines**  
blood oxygen content relations, during hypoxia (trout, eel), R240

blood sampling, stress due to routine handling (bird), R775

circulatory dynamics, periodic intracranial hypertension, fetus (sheep), R95

corticosterone and, role during anoxia and recovery (turtle), R770

depletion of diagonal band, baroreflex inhibition of supraoptic neurons and, R363

selective activation, adrenal medulla, R716

**CCK**: *see Cholecystokinin*

**CCK-8**: *see Cholecystokinin octapeptide*

**Cecum**, ligation and puncture, sepsis effects on absorptive capacity, R119

**Cells**: *see also specific cell*  
alterations, exercise-induced, diaphragm, R1093

**Cellulose**, food intake, digestion efficiency and, R852

**Central nervous system**  
amiloride-sensitive sodium uptake, ANP effects, R279

angiotensin, hemodynamic effects, awake state, R845

control, vasopressin release, sex differences, R1030

regulation, feeding, interferons and, R1222  
 vasopressin, regulation of fever in bacterial infection, R1235

Cerebellum  
 fastigial nucleus, nitric oxide and, R1156  
 membrane and synaptic activity, during anoxia (turtle), R1057

Cerebral arteries, endothelin-1 effects (goat), R834

Cerebral cortex  
 medial prefrontal, lactate release and habituation to stress, R722  
 prepyriform, clonidine and amino acid imbalance, R885  
 sympathetic responses, medulla, R544

Cerebral ventricles  
 anteroventral third, lesion, cholinergic activation of subfornical organ and, R1277  
 central angiotensin, hemodynamic effects, awake state, R845

Cerebrospinal fluid, central regulation, feeding, interferons and, R1222

Cerebrovascular regulation, vasopressin and, fetus, R376

Cerebrovasodilation, cerebellar fastigial nucleus, nitric oxide effects, R1156

Ceruloplasmin, influenza virus, sleep induced by, R1115

cGMP: see Guanosine monophosphate, cyclic

CGRP: see Calcitonin gene-related peptide

Chloride-bicarbonate exchange, cell volume regulation, proximal tubular cells, R1086

Cholecystokinin  
 body temperature reduction, capsaicin effects, R1215

CCK-A receptor agonist, behavioral effects of, R125  
 near-ceeliac arterial, food intake suppression and, R572

PVN lesions and, inhibition of gastric motility and food intake, R39  
 satiety effects of, abdominal vagal mediation, R1354

Cholecystokinin A, gastrin receptors and, vagus nerve, R591

Cholecystokinin B, gastrin receptors and, vagus nerve, R591

Cholecystokinin octapeptide  
 gastric pressure, satiety and, women, R452  
 intraventricular, food intake and (baboon), R863

Cholestyramine, bile and (bird), R389

Chorda tympani, denervation, salt taste discrimination and, R169

Choroid plexus, cystatin C gene in, expression of, R195

Chromaffin cells, catecholamine-secretion, selective activation, adrenal medulla, R716

Chromatography, high-performance liquid, bradykinin (alligator), R400

Circadian clock, activity-rest cycle, feedback effects of, aging alterations, R981

Circulation: *see also* Blood flow;  
 Microcirculation  
 cardiac reflexes and, development of (frog), R602  
 cerebral, endothelin-1 and (goat), R834

control during orthostasis, aging effects, R1147  
 pulmonary and renal, during hypoxia, EDRF effects, R45

Clonidine, prepyriform cortex, amino acid imbalance and, R885

Cobalt protoporphyrin, injection, hypothalamic medial nuclei, weight loss and, R805

Cold  
 acclimation, brown adipocyte proliferation and, R1176  
 tolerance, reproductive function and, R820

Collagen, mesenteric resistance arteries, in pregnancy, R2

Comparative physiology, sodium-glucose transport, intestinal, R489

Converting enzyme inhibitor, renal nerve activity and, spontaneous hypertension, R109

Copper sulfate, intragastric, cardiovascular and emetic responses to (ferret), R284

Coronary arteries, endothelin-1 effects (goat), R834

Corticosteroids, adrenal, secretion, fetus (sheep), R936

Corticosterone  
 blood sampling, stress due to routine handling (bird), R775  
 catecholamines and, role during anoxia and recovery (turtle), R770  
 healing of intestinal anastomoses, after adrenalectomy, R164

Cortisol  
 ANP with, exercise in hypobaric conditions and, R647  
 secretion, right atrial receptor control of, R1071

Cortisone, sleep modulation, bacterial infection and, R1339

Cryopreservation, freezing, liver, freeze-tolerance and (wood frog), R185

Current, short-circuit, amiloride-stimulated, calcium channel blocker effects, tadpole skin (frog), R827

Cystatin C gene, choroid plexus, expression of, R195

Cysteine, liver, glutathione synthesis, R348

Cytochrome oxidase, activity, swimming performance and (fish), R1042

Cytokines  
 central regulation and, feeding, R1222  
 inflammatory, magnesium deficiency and, R734  
 LPS fever suppression and, R653

**D**

Dehydration, exercise thermoregulation effects (goat), R201

Deoxycorticosterone acetate, exercise-induced proteinuria and, hypertension (miniature swine), R954

Desimipramine, depletion of diagonal band, baroreflex inhibition of supraoptic neurons and, R363

Detrusor muscle, hyperplasia, obstructed bladder (guinea pig), R1284

Development: *see also* Growth; Maturation  
 blood pressure, cardiac reflexes (frog), R602  
 changes, hindlimb muscles and dia-phragm (sheep), R900

intestinal, protein synthesis in (lamb), R1318

oxytocin prohormone processing, alterations in, fetus (sheep), R738

Dexamethasone, ANP-like substance release, cardiocytes (trout), R447

Diaphragm  
 breathing dynamics, fractal properties of, fetus (sheep), R141  
 developmental changes (sheep), R900  
 exercise effects, cellular alterations, R1093

Diencephalon  
 delayed firing rate response, temperature, R679  
 neural networks in, thermosensitive, R670

Digestion, efficiency, reduced food intake and, R852

4,4'-Diisothiocyanostilbene-2,2' disulfonic acid, ion transport, mantle epithelium (clam), R76

Diltiazem  
 absorptive capacity and, intestine, R19 diverse effects, glucose transport, skeletal muscle, R70  
 hepatic calcium regulation and, during sepsis, R553

interstitial infusion, sodium and water excretion with, medullary, R1064

Dinitrophenol, electrophysiological effects, Malpighian tubules, R609

Diuresis  
 cholinergic activation of subfornical organ, AV3V lesion and, R1277  
 dopamine receptors and, fetus (sheep), R868

Diving  
 arterial blood pressure during, baroreflex control (duck), R693  
 forced, metabolic responses (duck), R1309  
 nasal water flow, cardiovascular response to, R1049

Dopamine  
 agonist actions, ontogeny of, R631  
 receptors: *see* Receptors  
 selective activation, adrenal medulla, R716

Double labeled water method, comparison with calorimetry, determining energy expenditure in preterm infant, R685

Drinking  
 sodium chloride inhibition, gastric motility and food intake, R9  
 thirst, angiotensin-induced salt appetite, oxytocin effects, R1347

Duodenum, preabsorptive origin, gustatory alliesthesia, R1013

**E**

Edema  
 cerebral, PAF effects on glycine changes, R909  
 pulmonary, pulmonary vascular response to anaphylaxis, R1024

EDRF: *see* Endothelium-derived relaxing factor

Eicosanoids, exercise-induced proteinuria and, hypertension (miniature swine), R954

Elastin, mesenteric resistance arteries, in pregnancy, R1

**Electrophysiology**, epithelial, dinitrophenol and, Malpighian tubules, R609  
**Emesis**, intragastric copper sulfate effects (ferret), R284  
 **$\beta$ -Endorphin**, pituitary-adrenal axis, central hypovolemia, R156  
**Endothelial cells**, heparin effects, endothelin-1 actions in hypertension, R1035  
**Endothelin**  
 ANP with, exercise in hypobaric conditions and, R647  
 suppression of discharge, baroreceptors, high carotid sinus pressure, R103  
**Endothelin-1**  
 cerebral circulation and (goat), R834  
 gene expression, normobaric hypoxia effects, R1260  
 heparin suppression of, spontaneous hypertension, R1035  
 receptors: *see Receptors*  
**Endothelium-derived relaxing factor**  
 cerebrovasodilation and, cerebellar fastigial nucleus, R1156  
 vascular function, hypoxic regulation of, R45  
**Endotoxin**  
 fever induced by, modulation by endogenous glucocorticoids, R423  
 glucose response to, modulation by granulocyte colony-stimulating factor, R1122  
 increased glucose uptake and, leukocyte depletion, R1324  
**Energy**  
 expenditure  
   determination of, preterm infant, R685  
   sodium acetate and, R1271  
 metabolism, brain, anoxia tolerance (turle), R1298  
 production, muscle acidity and, exhaustive exercise, R891  
 regulation, underfeeding and, normal-weight young men, R250  
 restriction, triacylglycerol depletion during fasting, R233  
**Entrainment**, aging effects, circadian locomotor activity, R1099  
**Epinephrine**  
 blood oxygen content relations, during hypoxia (trout, eel), R240  
 corticosterone and, role during anoxia and recovery (turtle), R770  
 dietary obesity, adipose tissue lipolysis and, female, R1248  
 selective activation, adrenal medulla, R716  
**Epithelium, mantle**, ion transport (clam), R76  
**Epitrochlearis muscle**, glucose transport, calcium channel blocker effects, R70  
**Estrogen**  
 glucose use and, whole animal and tissue (trout), R1241  
 phosphorus deficiency and (cattle), R656  
**Exercise**  
 cellular alterations induced by, dia-phragm, R1093  
 exhaustive  
   glutathione oxidation and, blood, R992  
   muscle acidity and energy production during, R891  
 physical, hypobaric conditions, ANP secretion, R647  
 proteinuria induced by, in hypertension,

indomethacin effects (miniature swine), R954  
 reflex cardiovascular responses to, circulating vasopressin effects, R1104  
 swimming, performance correlates (fish), R1042  
 thermoregulation, hydration state effects (goat), R201

**F**

**Fasting**  
 hibernation and, ion secretion, intestine (squirrel), R1203  
 triacylglycerol retention during, liver and serum, R233

**Fat**  
 body weight regulation, underfeeding and, normal-weight young men, R251  
 dietary  
   diet selection and, serotonin effects, R559  
   insulin sensitivity and, R785  
   obesity, reversal of, female, R790

**Fatty acids**, free, control in adipose tissue, ectotherm vertebrates, R857

**Feedback**, aging alterations of, activity-rest cycle of circadian clock, R981

**Feeding**  
 amino acid imbalance and, prepyriform cortex, R885  
 bone appetite, phosphorus depletion effects (cattle), R656  
 CCK satiety effects, abdominal vagal mediation of, R1354  
 central regulation, interferons and, R1222  
 dietary control, intestinal nutrient transport, R496  
 food intake  
   A71623 effects, R125  
   bombesin-induced satiety, somatostatin and, R84  
   capsaicin effects on body temperature reduction, R1215  
   digestion efficiency and, R852  
   early insulin response after (geese), R782  
   intraventricular CCK-8 effects (baboon), R863  
   lesions of hypothalamic paraventricular nucleus and, R39  
   sodium chloride inhibition of, R9  
   suppression of, near-arterial CCK, R572  
   TNF- $\beta$  regulation of sleep, fever, and anorexia, R703, R708  
 food restriction, absence of suprachiasmatic nucleus and (hamster), R353  
 food selection, serotonin effects, dietary fat and, R559  
 high-fat diet, obesity induced by, reversal of, female, R790  
 high-starch diet, digestion efficiency and, R852  
 hunger and fullness, CCK-8 effects, women, R452  
 intragastric, gastric emptying during and after, R813  
 intrahypothalamic metalloporphyrins, weight loss and, R805  
 low- or high-fat diet, whole body insulin sensitivity, R785  
 meal-associated conditioning, insulin secretion, R615

rhythm, advance shift of, obesity progression and, R1169  
 schedules, circadian rhythms and (hamster), R116  
 underfeeding, energy regulation and, normal-weight young men, R250

**Fenoldopam**, dopamine receptor-mediated natriuresis and, R631

**Fetus**: *see also Placenta; Pregnancy*  
 breathing dynamics, fractal properties of (sheep), R141  
 cerebrovascular regulation, vasopressin and, R376  
 circulatory dynamics, periodic intracranial hypertension (sheep), R95  
 corticosteroid secretion, adrenal (sheep), R936

**dopamine receptor activation**, renal function (sheep), R868

**endocrinology**, peptide processing during development (sheep), R738

**extrapituitary ACTH secretion**, prostaglandin E<sub>2</sub> stimulation of (sheep), R136

growth retardation, heat-induced, glucose transport and, R578

hepatic and placental growth, ontogeny of (sheep), R619

nonlethal hypoxia, hindlimb metabolic adaptation to, R113

response to hypoxia, heart rate, vasoressin, and renin (sheep), R880

**Fever**  
 bacterial infection, vasopressin role in regulation of, R1235  
 endotoxin-induced, modulation by endogenous glucocorticoids, R423  
 growth hormone-releasing hormone antibodies, sleep and, R1078  
 induction, TNF- $\beta$ , R703, R708  
 influenza virus, sleep and acute phase response changes, R1115  
 interferons, central regulation of feeding and, R1222  
 LPS  
   interleukin-1 suppression of, R653  
   TNF- $\alpha$  attenuation of, R987

**Filtration**, glomerular, ANP and angiotensin II interactions, awake state, R537

**Flow**, perfusion, nasal mucosa (seal), R1291

**Forskolin**, control in adipose tissue, ectotherm vertebrates, R857

**Freezing**, cryomicroscopic analysis, liver (wood frog), R185

**Furosemide**, inhibition of sodium transport, intrarenal pressure during, R1182

**G**

**Gaseous metabolism**, hypoxia and ambient temperature effects, newborn, R267

**Gastric distension**, CCK-8 effects on hunger, women, R452

**Gastric emptying**, dynamics of, during and after stomach fill, R813

**Gastric mucosa**  
 ion secretion  
   after jejunal bypass (squirrel), R1209  
   hibernation and fasting effects (squirrel), R1203

**Gastrointestinal tract**, sodium-D-glucose cotransport kinetics in (teleost), R1018

**Gene expression**  
 choroid plexus, conservation of, R195  
 endothelin-1, normobaric hypoxia effects, R1260  
**Gills**, oxygen transfer, digital image analysis (shark), R741  
**Glucocorticoids**  
 adrenal, secretion, fetus (sheep), R936  
 healing of intestinal anastomoses, after adrenalectomy, R164  
 modulation of fever, endotoxin-induced, R423  
 sleep modulation, bacterial infection and, R1339  
 vasopressin and angiotensin II control of, water deprivation effects, R762  
**Gluconeogenesis**, endotoxin effects, granulocyte colony-stimulating factor and, R1122  
**Glucose**  
 blood, meal-associated conditioned insulin secretion and, R615  
 food intake, early insulin response after (geese), R782  
 gastric emptying, during and after stomach fill, R813  
 metabolic response to endotoxin, modulation by granulocyte colony-stimulating factor, R1122  
 regulation, hormones, anoxia and recovery (turtle), R770  
 transport  
   intestines, R458, R472  
   muscle, calcium channel blocker effects, R70  
 transport system, ventromedial hypothalamic stimulation effects, R1228  
 uptake, sepsis- and endotoxin-induced, leukocyte depletion and, R1324  
 use, whole animal and tissue, estrogen effects (trout), R1241  
**D-Glucose**, kinetic heterogeneity, gastrointestinal tract (teleost), R1018  
**Glutamate**, nucleus tractus solitarius input, parabrachial neurons, R324  
**Glutathione**  
 oxidation of, exhaustive exercise and, blood, R992  
 synthesis, stimulation by thiols, R348  
**Glycerol**, control in adipose tissue, ectotherm vertebrates, R857  
**Glycine**, PAF effects, traumatic brain injury, R909  
**G proteins**, adrenergic regulation, brown fat, neonate, R34  
**Granulocyte colony-stimulating factor**, modulation, glucose metabolic response to endotoxin, R1122  
**Growth**: *see also Development; Maturation*  
 detrusor hyperplasia, obstructed bladder (guinea pig), R1284  
 phosphorus depletion effects (cattle), R656  
 placenta and liver, ontogeny of, fetus (sheep), R619  
 retardation, heat-induced, fetus, plasma glucose transport and, R578  
**Growth factor**, central regulation and, feeding, R1222  
**Growth hormone-releasing hormone antibodies**, sleep, sleep deprivation and, R1078  
**Guanosine monophosphate**, cyclic, amiloride-sensitive sodium uptake, ANP effects, R279

**Gustatory alliesthesia**, duodenal preabsorptive origin of, R1013  
**Gustatory response**, salt, chorda tympani denervation and, R169  
**Gut**: *see Intestine*

**H**

**Heart**  
 glucose transport system, ventromedial hypothalamic stimulation effects, R1228  
 linoleic acid-enriched triglycerides, retention during fasting, R233  
 metabolic state, during severe hypoxia (trout), R798  
**Heart rate**  
 age and blood pressure effects, response to hypoxia, fetus (sheep), R880  
 ANP secretion, exercise in hypobaric conditions and, R647  
 baroreflex control of, CGRP effects, R874  
 control, baroreflex modulation by angiotensin peptides, R89  
 development and (frog), R602  
 reflex regulation of, vasopressin and angiotensin II in, R756  
 Heat, growth retardation induced by, fetus, glucose transport and, R578  
**Hematocrit**, determination, microsphere and dilution techniques for, R728  
**Hemorrhage**, hypoxia and, renin response to, R664  
**Heparin**, endothelin-1 action and, spontaneous hypertension, R1035  
**Hibernation**  
 fasting and, ion secretion, intestine (squirrel), R1203  
 jejunal bypass and, ion secretion after (squirrel), R1209  
 nutrient transport during, maintenance of, R517  
 temperature dependence, myocytes (guinea pig, squirrel), R177  
**Hindlimb**, metabolic adaptation, severe, nonfatal hypoxia, fetus, R1130  
**Hip joint**, torque profile of, muscle, joint, and tendon contributions to (frog), R586  
**Histamine antagonists**, hypovolemic shock and, head-up tilt, R156  
**Hydration state**, exercise thermoregulation effects (goat), R201  
**Hydrogen**, clearance method, hypocapnia (geese), R221  
**6-Hydroxydopamine**, depletion of diagonal band, baroreflex inhibition of supraoptic neurons and, R363  
**Hypercapnia**, input to A1 neurons, projecting into supraoptic nucleus, R310  
**Hyperosmolality**  
 ammonia-mediated inflammation and, renal medulla, R148  
 vasopressin and ACTH responses to hypoglycemia, awake state, R382  
**Hypertension**  
 arterial baroreflex, transfer function analysis of, R524  
 baroreflex modulation, angiotensin peptides, R89  
 exercise-induced proteinuria in, indo-methacin effects (miniature swine), R954  
 periodic intracranial, circulatory dynamics during, fetus (sheep), R95

pulmonary, endothelin-1 gene expression and, R1260  
 short-term reduction in pressure, renin response to, R405  
 spontaneous

heparin suppression of endothelin-1 actions, R1035

renal nerve activity, converting enzyme inhibitor effects, R109

**Hypocapnia**, regional cerebral blood flow, tissue oxygenation and (geese), R221

**Hypocapnia**, regional cerebral blood flow, tissue oxygenation and (geese), R221

**Hypotension**, vasopressin and ACTH responses to hypoglycemia, awake state, R382

**Hypothalamus**

delayed firing rate response, temperature, R679

medial nuclei, cobalt protoporphyrin injection into, weight loss and, R805 neural networks in, thermosensitive, R670

paraventricular nucleus, lesions, gastric motility after, R39

suprachiasmatic nucleus, isoperiodic neuronal activity in, R51

supraoptic neurons, baroreflex inhibition of, catecholamines and, R363

supraoptic nucleus, A1 neurons projecting into, inputs to, R310 sympathetic responses, medulla, R544

ventromedial nucleus  
 brown fat responses, strain differences in rats, R59

stimulation effects, glucose transport system, R1228

**Hypothermia**, thermoregulatory responses, isoproterenol, R915

**Hypovolemia**, central, histamine antagonists and, R156

**Hypoxemia**, exercise in hypobaric conditions and, R647

**Hypoxia**

ambient temperature and, effects on gaseous metabolism, newborn, R267 catecholamine levels, blood oxygen content relations (trout, eel), R240 cerebral, tolerance (turtle), R1298 endothelin-1 gene expression and, R1260 glucose transport and, skeletal muscle, R70

heart rate, vasopressin, and renin response to, aging and blood pressure effects, fetus (sheep), R880

hemorrhage and, renin response to, R664

input to A1 neurons, projecting into supraoptic nucleus, R310

nonlethal, hindlimb adaptation to, fetus, R1130

regulation of vascular function, EDRF and, R45

severe, metabolic state of heart during (trout), R798

**I**

**Immune system**, regulation, feeding, interferons and, R1222

**Immunoglobulin G**

growth hormone-releasing hormone antibodies, sleep and, R1078

selective transport, lymph and plasma, neonate (pig), R976

**Immunoglobulin G (continued)**  
 transport of, precocious cessation by synthetic trypsin inhibitor, intestine, suckling, R996

**Indomethacin**, exercise-induced proteinuria and, hypertension (miniature swine), R954

**Infant**, preterm, determining energy expenditure in, R685

**Infertility**, neural regulation, vas deferens, R331

**Influenza virus**, changes induced by, sleep and acute phase responses, R1115

**Insulin**  
 early response, after food intake (geese), R782  
 glucose transport and, skeletal muscle, R70  
 glucose transport system, ventromedial hypothalamic stimulation effects, R1228  
 secretion, conditioned, meal-associated, R615  
 sensitivity, whole body, low- or high-fat diet effects, R785

**Interferon**  
 central regulatory and, feeding, R1222  
 influenza virus, sleep induced by, R1115

**Interleukin-1**  
 aldosterone secretion and, R840  
 receptors: *see Receptors*

**Interleukin-1 $\beta$** , fever, TNF- $\alpha$  attenuation of, R987

**Intestinal diverticula**, nutrient absorption, invertebrates, R472

**Intestine**  
 absorptive capacity, sepsis depression of, R19  
 anastomoses, healing with corticosterone, R164  
 developing, protein synthesis in (lamb), R1318  
 ion secretion  
   after jejunal bypass (squirrel), R1209  
   hibernation and fasting effects (squirrel), R1203  
 macromolecular transport, synthetic trypsin inhibitor effects, suckling, R996  
 nutrient absorption, basolateral membrane, R482  
 nutrient transport, R457  
 apical membrane mechanisms of, R458  
 dietary control of, R496  
 during ontogeny, vertebrates, R503  
 maintenance during hibernation, R517  
 reflux, bile and lipid assimilation (bird), R389  
 sodium-D-glucose cotransport kinetics in (teleost), R1018  
 sodium-glucose transport, comparative studies, R489

**Ions**, transport, mantle epithelium (clam), R76

**Iron**, uptake, transferrin degradation relations, brain, R924

**Isoproterenol**  
 pressure-dependent renin release,  $\beta$ -adrenoceptors and, hypertension, R405  
 thermoregulatory responses to,  $\beta$ -adrenergic antagonists and, R915

**J**

**Jejunum**  
 ion secretion  
   after jejunal bypass (squirrel), R1209  
   hibernation and fasting effects (squirrel), R1203

**Joint**, torque profile and, hip joint (frog), R586

**K**

**Kaliuresis**, cholinergic activation of subformical organ, AV3V lesion and, R1277

**Kallikrein**, biological activity, purification and (alligator), R400

**Kidney**  
 function, dopamine receptor activation, fetus (sheep), R868  
 glutathione synthesis, thiol stimulation, R348  
 hemodynamic responses to amino acids, endothelium-derived nitric oxide effects, R510  
 responses, ANP-mediated volume depletion and, R1303  
 responses to volume expansion, kinin receptor antagonist effects, R1136  
 sodium-glucose transport, comparative studies, R489  
 sympathetic outflow, vasopressin suppression of, R1187  
 vasopressin metabolism, ANP effects, R273

**Kidney cells**, proximal tubular, cell volume regulation, calcium role in, R1086

**Kidney glomerulus**, responses to volume expansion, kinin receptor antagonist effects, R1136

**Kidney medulla**  
 ammonia-mediated inflammation, hyperosmolality and, R148  
 diltiazem infusion, sodium and water excretion alteration, R1064

**Kidney papilla**, responses to volume expansion, kinin receptor antagonist effects, R1136

**Kidney tubules**  
 distal, luminal pH in (amphibian), R1254  
 proximal, cell volume regulation, calcium role in, R1086

**Kininogen**, biological activity, purification and (alligator), R400

**Kinins**, receptors: *see Receptors*

**L**

**Lactate**  
 blood sampling, stress due to routine handling (bird), R775  
 production, muscle acidity and, exhaustive exercise, R891  
 release, cerebral, habituation to stressful stimuli and, R722  
 severe hypoxia, metabolic state of heart during (trout), R798

**Lactic acid**, nonlethal hypoxia, hindlimb adaptation to, fetus, R1130

**Lamellar transit time**, blood, digital image analysis (shark), R741

**Laryngeal nerve**, stimulation, chemoreceptor drive and, R1049

**Leukocytes**, depletion, glucose uptake, sepsis and endotoxin effects, R1324

**Leukopenia**, glucose uptake, sepsis- and endotoxin-induced increase in, R1324

**Leydig cells**, testes, endothelin-1-specific receptors in, R15

**Light**  
 high-intensity, circadian adaptation, R428

**irradiance responsivity**, unequivocal type-1 phase responsivity and, R1110

**Linoleic acid**, triacylglycerols enriched with, retention, liver and serum during fasting, R233

**Lipase**, digestion, wax ester assimilation, R464

**Lipids**  
 digestion, wax ester assimilation, R464  
 neutral, assimilation, bile and (bird), R389

**Lipolysis**  
 adipose tissue  
   control, ectotherm vertebrates, R857  
   diet-induced obesity and, female, R1248

**Lipoproteins**  
 fever  
   interleukin-1 suppression of, R653  
   TNF- $\alpha$  attenuation of, R987

**Lisinopril**, renal nerve activity and, spontaneous hypertension, R109

**Liver**  
 freezing, freeze-tolerance and (wood frog), R185  
 glutathione synthesis, thiol stimulation, R348  
 growth, ontogeny of, fetus (sheep), R619  
 linoleic acid-enriched triglycerols, retention during fasting, R233  
 regulation, septic shock, R553

**Locomotor activity**, circadian, aging effects, R1099

**LPS**: *see Lipopolysaccharides*

**Lung**  
 anaphylaxis, pulmonary vascular response to, R1024  
 periodic inflation, entrainment of respiratory rhythm by, R292

**Lymph**, IgG transport into, neonate (pig), R976

**Lymphotoxin**, sleep, fever, anorexia and, R703, R708

**M**

**Macromolecules**  
 transport of  
   plasma and lymph (pig), R976  
   precocious cessation by synthetic trypsin inhibitor, intestine, suckling, R996

**Macronutrients**, selection, serotonin effects, R559

**Magnesium**, deficiency, pathobiology of, R734

**Malpighian tubules**, dinitrophenol effects, R609

**Maturation**: *see also Development; Growth*  
 breathing dynamics, fractal properties of, fetus (sheep), R141

**Medulla oblongata, sympathoexcitatory neurons, midbrain central gray effects, R24**

**Medullary raphe, stimulation, sympathetic nerve rhythms and, R564**

**Membrane**  
apical, nutrient transport mechanisms, intestines, R458  
basolateral, nutrient absorption, intestine, R482

**Mesenteric resistance arteries, composition and mechanics, in pregnancy, R2**

**Metalloporphyrins, intrahypothalamic, weight loss and, R805**

**Metamorphosis, amiloride-stimulated short-circuit current, calcium channel blockers and, tadpole skin (frog), R827**

**N-methyl-D-aspartate, nucleus tractus solitarius input, parabrachial neurons, R324**

**Methylene blue, neurogenic cerebrovasodilation, nitric oxide and, R1156**

**Microcirculation: see also Blood flow; Circulation**  
albumin transport, blood-tissue, ANP infusion effects, R945

**Microscopy, electron, ANF binding sites, area postrema, R747**

**Microspheres, radiolabeled, determination of blood flow and volume, R728**

**Midbrain, central gray, sympathoexcitation and, R24**

**Mitose, sympathetic innervation, brown adipocyte proliferation and, R1176**

**Models**  
compartmental, aging changes in zinc metabolism, R1162  
network, respiratory rhythogenesis, R962  
oxygen transfer, gill, digital image analysis (shark), R741  
population, comparing responses when each response is a curve, R206

**Morphine, localization and secretion, brain, R301**

**Motility**  
gastric  
lesions of hypothalamic paraventricular nucleus and, R39  
sodium chloride inhibition of, R9

**Muscle**  
acidity, energy production and, exhaustive exercise, R891  
respiratory, exercise effects on cellular alterations, R1093  
torque profile and, hip joint (frog), R586

**Muscle, skeletal**  
developmental changes, hindlimb and diaphragm (sheep), R900  
forced dive effects, indirect calorimetry and <sup>31</sup>P-NMR (duck), R1309  
glucose transport, calcium channel blocker effects, R70

**Muscle, smooth, hyperplasia, obstructed bladder (guinea pig), R1284**

**Muscle cells, vascular smooth, heparin suppression of endothelin-1 actions, hypertension, R1035**

**Myocytes: see also Cardiocytes**  
electrophysiological properties of, temperature dependence (guinea pig, squirrel), R177

**Myoid cells, peritubular, endothelin-1-specific receptors in, R15**

**Myosin, developmental changes, hindlimb muscles and diaphragm (sheep), R900**

**N**

**Nasal mucosa, adrenergic vasomotor responses in (seal), R1291**

**Nasal vein, drainage, adrenergic vasomotor responses (seal), R1291**

**Natriuresis**  
ANP-mediated volume depletion and, R1303  
cholinergic activation of subfornical organ, AV3V lesion and, R1277  
dopamine receptor-mediated fetus (sheep), R868  
ontogeny of, R631  
interstitial diltiazem infusion and, kidney medulla, R1064

**Neonate: see also Newborn**  
brown fat, adrenergic regulation of adenylyl cyclase in, R34  
selective transport of macromolecules, plasma and lymph (pig), R976

**Neural control, cardiovascular system, input to nucleus tractus solitarius, R368**

**Neurohypophysis**  
oxytocin inhibition, angiotensin-induced salt appetite, R1347  
vasopressin and ACTH, awake state, R382

**Neurons**  
A5, splanchnic nerve response, R437  
A1 area, chemoreceptor and baroreceptor responses, R310  
suprapubic  
baroreflex inhibition of, catecholamines and, R363  
depolarization, angiotensin II receptors and, R1333  
sympathoexcitatory, midbrain central gray effects, R24  
thermosensitive, networks, diencephalon, R670

**Neutropenia, glucose uptake, sepsis- and endotoxin-induced increase in, R1324**

**Neutrophils, glucose metabolism, granulocyte colony-stimulating factor and, R1122**

**Newborn: see also Neonate**  
gaseous metabolism, hypoxia and ambient temperature effects, R267

**Nifedipine, diverse effects, glucose transport, skeletal muscle, R70**

**Nitric oxide**  
cerebrovasodilation and, cerebellar fastigial nucleus, R1156  
endothelium-derived, hemodynamic response to amino acids and, R510

**Noradrenergic cells, A5, splanchnic nerve response, R437**

**Norepinephrine**  
amino acid imbalance and, prepyriform cortex, R885  
blood oxygen content relations, during hypoxia (trout, eel), R240  
brown fat responses, strain differences in rats, R59

**corticosterone and, role during anoxia and recovery (turtle), R770**

**depletion of diagonal band, baroreflex**

**inhibition of supraoptic neurons and, R363**

**protein synthesis stimulated by, brown adipocytes, R1003**

**selective activation, adrenal medulla, R716**

**sympathetic innervation, brown adipocyte proliferation and, R1176**

**Nuclear magnetic resonance, <sup>31</sup>P-, metabolic responses to forced dives (duck), R1309**

**Nucleus tractus solitarius**  
arterial chemoreceptor input to, R368  
blood pressure control and, chronic sinoaortic denervation, R258  
excitatory amino acid mediation, input to parabrachial neurons, R324

**Nutrients**  
intestinal absorption  
basolateral membrane in, R482  
diverticula, invertebrates, R472  
intestinal transport, R457  
apical membrane mechanisms of, R458  
dietary control of, R496  
during ontogeny, vertebrates, R496  
maintenance during hibernation, R517

**Nutrition, luminal, intestinal secretion after jejunal bypass (squirrel), R1209**

**O**

**Obesity**  
body weight regulation, underfeeding and, normal-weight young men, R251

**dietary**  
adipose tissue lipolysis and, female, R1248  
insulin sensitivity and fat, R785  
reversal of, female, R790  
progression, advance shift of feeding rhythms and, R1169

**Orthostasis, circulatory control during, aging effects, R1147**

**Oscillation, high-frequency, nerve activity in fictive vomiting, R339**

**Osmoregulation, sodium chloride inhibition, gastric motility and food intake, R9**

**Osteocalcin, phosphorus deficiency and (cattle), R656**

**Oxidation, glutathione, blood, exhaustive exercise and, R992**

**Oxygen**  
consumption  
ambient temperature and hypoxia effects, newborn, R267  
hepatic and placental growth, fetus (sheep), R619  
tension, endothelin-1 gene expression in hypoxia, R1260  
transfer, gill, modeling of (shark), R741  
uptake  
hindlimb metabolic adaptation to, R113  
muscle acidity and, exhaustive exercise, R891

**Oxygenation, tissue, during hypoxia (geese), R221**

**Oxygen dissociation curves, catecholamines and, during hypoxia (trout, eel), R240**

## SUBJECT INDEX TO VOLUME 32

**Oxytocin**  
central inhibition, angiotensin-induced salt appetite, R1347  
processing, during development, fetus (sheep), R738  
**PVN lesions and, inhibition of gastric motility and food intake, R39**  
sodium chloride inhibition, gastric motility and food intake, R9

**P**

**PAF:** see Platelet-activating factor

**Parabrachial nucleus, excitatory amino acid input to, R324**

**Parasympathetic nervous system, insulin secretion, meal-associated conditioned, R615**

**Parathyroid hormone, phosphorus deficiency and (cattle), R656**

**Paraventricular nucleus, oxytocin inhibition, angiotensin-induced salt appetite, R1347**

**Pelvic nerve, regulation, vas deferens, R331**

**Peptides**  
endothelium-derived vasoconstrictor, cerebral circulation and (goat), R834 processing, during development, fetus (sheep), R738

**Peritonitis**  
intra-abdominal, calcium ion-related hepatocellular alterations during, R553 sepsis effects, gut absorptive capacity, R19

**Permeability, capillary, ANP infusion effects on albumin transport, R945**

**pH**  
intracellular, cerebral anoxia tolerance (turtle), R1298 luminal, distal tubule (amphibian), R1254

**Phase responses, acute, changes, influenza virus and, R1115**

**Phosphate, phosphorus deficiency and (cattle), R656**

**Phosphocreatine, severe hypoxia, metabolic state of heart during (trout), R798**

**Phosphorus, depletion, behavioral and tissue responses (cattle), R656**

**Photoperiod, cold tolerance, reproductive function and, R820**

**Phrenic nerve, activity, during fictive vomiting, R339**

**Pituitary gland, vasopressin and ACTH, awake state, R382**

**Placenta:** see also Fetus; Pregnancy calcium ion transport across, gestational changes, R930 glucose transport, heat-induced growth retardation and, fetal, R578 growth, ontogeny of, fetus (sheep), R619

**Plasma, IgG transport into, neonate (pig), R976**

**Platelet-activating factor, traumatic brain injury and, R909**

**Posture**  
head-up tilt  
carotid baroreflexes and vasopressin, R318 pituitary-adrenal response to, R156

**Potassium channels, calcium-activated, cell volume regulation, proximal tubular cells, R1086**

**Potassium chloride, taste discrimination, chorda tympani denervation and, R169**

**Potassium ions, activity, during anoxia, cerebellum (turtle), R1057**

**Potentials, compound action, renal afferent input to ventrolateral medulla, R412**

**Pramipexole, dopamine receptor-mediated natriuresis and, R631**

**Pregnancy:** see also Fetus; Placenta mesenteric resistance arteries in, R2 urinary output, arterial pressure relations (sheep), R1141

**Pressor response, exercise, vasopressin and, R1104**

**Pressure:** see also Blood pressure arterial cholinergic activation of subfornical organ, AV3V lesion and, R1277 intragastric copper sulfate effects (ferret), R284 lability, renal sympathetic nerve activity and, R639 regulation, splanchnic nerve response, R437 renal nerve effects, spinal transection, R1265 sympathoadrenalin-circulatory regulation, during stress, aging effects, R1147 urinary output relations, pregnancy and (sheep), R1141 capillary, isogravimetric, lung, R1024 carotid sinus, endothelin effects on baroreceptor discharge, R103 central venous, ANP-mediated volume depletion and, R1303 gastric, CCK-8 effects, women, R452 intracranial, hypertension, circulatory dynamics and, fetus (sheep), R95 intrarenal, direct inhibition of sodium transport and, R1182 short-term reductions,  $\beta$ -adrenoceptor modulation of renin response to, hypertension, R405

**Progesterone, phosphorus deficiency and (cattle), R656**

**Proline, transport, intestinal, maintenance during hibernation, R517**

**Propranolol**  
pressure-dependent renin release,  $\beta$ -adrenoceptors and, hypertension, R405 thermoregulatory responses to,  $\beta$ -adrenergic antagonists and, R915

**Prostaglandins**  
aldosterone secretion, interleukin-1 stimulation of, R840 exercise-induced proteinuria and, hypertension (miniature swine), R954

**Prostaglandin E<sub>2</sub>, extrapituitary ACTH secretion, fetus (sheep), R136**

**Proteins**  
calcium-binding, gestational changes, placenta, R930 synthesis longitudinal variations in, developing intestine (lamb), R1318 norepinephrine-stimulated, brown adipocytes, R1003

**Pump**  
calcium, gestational changes, placenta, R930 proton, mantle epithelium (clam), R76

**Purkinje cells, membrane and synaptic activity, during anoxia (turtle), R1057**

**PVN:** see Hypothalamus, paraventricular nucleus

**Pyrogens, endogenous, TNF- $\alpha$  attenuation of, R987**

**R****Receptors**

$\beta$ -adrenoceptors, modulation of renin response, pressure reduction, hypertension, R405

angiotensin II, depolarization of supraoptic neurons and, R1333

baroreceptors  
denervation, vasopressin suppression of neural system, R1187 nucleus tractus solitarius and sinoauric denervation, R258 sinoauric, denervation, R639 suppression of discharge by endothelin, R103

CCK, CCK-8 effects on satiety (baboon), R863

chemoreceptors  
arterial, input to nucleus tractus solitarius, R368 nasal stimulation and, R1049

dopamine  
natriuresis mediated by, R631 renal response to (sheep), R868 endothelin-1-specific, testicles, R15 gastrin, CCK-A and CCK-B with, vagus nerve, R591 interleukin-1, LPS fever suppression, R653

kinin, renal responses to volume expansion and, R1136

right atrial, renin, vasopressin, and cortisol secretion, R1071

**Reflexes**  
baroreflexes  
arterial, transfer function analysis in hypertension, R524 carotid, head-up tilt, R318 CGRP effects, R874 function during diving (duck), R693 midbrain central gray effects, R24 modulating by centrally infused angiotensin peptides, R89 renal nerve activity, spontaneous hypertension, R109 reproducibility of responses, R215 Bezold-Jarisch, medullary pathway of, R1195 cardiac, blood pressure and, development of (frog), R602 cardiovascular, exercise, circulating vasopressin modulation of, R1104 regulation ACTH, glucocorticoids, and renin, R762 heart rate, angiotensin II and vasopressin in function of, R756

**Renal nerve**  
activity, spontaneous hypertension, converting enzyme inhibitor effects, R109 afferent, input to ventrolateral medulla, R412 influence on renal function and arterial pressure, spinal transection, R1265

**Renin**  
age and blood pressure effects, response to hypoxia, fetus (sheep), R880

aldosterone secretion, interleukin-1 stimulation of, R840  
dopamine receptors and, fetus (sheep), R868  
plasma activity, renal nerve effects, spinal transection, R1265  
release, ANP effects, awake state, R529  
response  
hemorrhage, hypoxia attenuation of, R664  
reduction in pressure,  $\beta$ -adrenoceptor modulation of, hypertension, R405  
secretion, right atrial receptor control of, R1071  
vasopressin and angiotensin II control of, water deprivation effects, R762  
Renin-angiotensin-aldosterone system, carotid baroreflexes and vasopressin, head-up tilt, R318  
Renin-angiotensin system  
interleukin-1 stimulation, aldosterone secretion, R840  
physiological and pharmacological concentrations, interactions, awake state, R537  
Reproduction, cold tolerance and, R820  
Resistance  
insulin, whole body, low- or high-fat diet effects, R785  
renal vascular, ANP effects on vasopressin metabolism, R273  
vascular  
blood pressure during diving and (duck), R693  
nasal mucosa (seal), R1291  
regional, splanchnic nerve response to A5 area stimulation, R437  
Respiration  
ambient temperature, hypoxia and, neonate, R267  
dynamics, fractal properties of, fetus (sheep), R141  
sodium acetate and, R1271  
swallowing and, coordination of, R624  
Respiratory control  
arterial chemoreceptors, input to nucleus tractus solitarius, R368  
entrainment, periodic lung inflation, R292  
rhythmogenesis, network model, R962  
Respiratory nerve, activity, during fictive vomiting, R339  
Respiratory pattern, swallowing and, R624  
Resynchronization, aging effects, circadian locomotor activity, R1099  
Rhythms  
circadian  
absence of suprachiasmatic nucleus and (hamster), R353  
adaptation, high-intensity light for, R428  
feeding, advance shift, obesity and, R1169  
feeding schedules and (hamster), R116  
irradiance responsivity and unequivocal type-1 phase responsivity, R1110  
neuronal activity, suprachiasmatic nucleus, R51  
pulsatile, fetal glucocorticoid (sheep), R936  
respiratory, entrainment by periodic lung inflation, R292  
sympathetic nerve, forced oscillations in, R564  
Rhythmogenesis, respiratory, network model of, R962  
Rostral ventrolateral medulla, pathway, Bezold-Jarisch reflexes, R1195  
**S**  
Salt  
appetite, angiotensin-induced, oxytocin effects, R1347  
taste discrimination, chorda tympani denervation and, R169  
Satiety  
bombesin-induced, mediation by luminal somatostatin, R84  
CCK, abdominal vagal mediation, R1354  
CCK-8 effects, women, R452  
CCK receptors, vagus nerve, R591  
duodenal preabsorptive origin, gustatory alliesthesia, R1013  
food intake  
intraventricular CCK-8 effects (boar), R863  
suppression of, near-arterial CCK, R572  
gastric emptying, during and after stomach fill, R813  
Seasonal variations, performance correlates, swimming (fish), R1042  
Sepsis  
depression, gut absorptive capacity, R19 increased glucose uptake and, leukocyte depletion, R1324  
intra-abdominal, calcium ion-related hepatocellular alterations during, R553  
Serotonin, diet selection, dietary fat effects, R559  
Serum, linoleic acid-enriched triglycerols, retention during fasting, R233  
Sex differences, vasopressin release, central control of, R1030  
Shift work, high-intensity light, circadian adaptation and, R428  
Shock  
hypovolemic, head-up tilt, pituitary-adrenal response to, R156  
septic, hepatic regulation of, R553  
Shunt, aortocaval, localization and secretion of brain natriuretic peptide, R301  
Sinoaortic denervation, arterial pressure lability, renal sympathetic nerve activity and, R639  
Skin, calcium channel blocker effects, amiloride-stimulated short-circuit current (frog), R827  
Sleep  
changes, influenza virus and, R1115  
deprivation, growth hormone-releasing hormone antibodies and, R1078  
induction, TNF- $\beta$ , R703, R708  
modulation of, cortisone, bacteria infection and, R1339  
schedule, high-intensity light for adaptation to, R428  
Sodium  
excretion  
ANP and angiotensin II interactions, awake state, R537  
ANP effects on renin release, awake state, R529  
ANP effects on vasopressin metabolism, R273  
diltiazem effects, medullary, R1064  
renal nerve effects, spinal transection, R1265  
intake, urinary output and blood pressure relations, pregnancy (sheep), R1141  
transport  
calcium channel blockers and, tadpole skin (frog), R827  
direct inhibition of, intrarenal pressure during, R1182  
uptake, amiloride-sensitive, ANP effects, brain, R279  
Sodium acetate, metabolic and respiratory effects, R1271  
Sodium chloride  
appetite, angiotensin-induced, oxytocin effects, R1347  
inhibition, gastric motility and food intake, R9  
taste discrimination, chorda tympani denervation and, R169  
Sodium-D-glucose cotransport, kinetic heterogeneity, gastrointestinal tract (teleost), R1018  
Sodium-glucose transport, comparative studies, intestinal, R489  
Sodium-hydrogen antiporter, dopamine receptor-mediated, ontogeny of, R631  
Sodium nitroprusside, baroreflex and, heart rate and renal sympathetic nerve activity, R874  
Solitary tract nucleus  
Bezold-Jarisch reflexes, R1195  
sympathetic responses, forebrain, R544  
Somatostatin, luminal, bombesin-induced satiation and, R84  
Spinal cord transection, renal function and arterial pressure in, renal nerve influences on, R1265  
Splanchnic nerve  
least, input to ventrolateral medulla, R412  
response, A5 area stimulation, R437  
Stomach, fill, gastric emptying during and after, R813  
Stress  
habituation to, cerebral lactate release and, R722  
orthostatic, circulatory control during, aging effects, R1147  
routine handling and (bird), R775  
Subfornical organ, cholinergic activation of, AV3V lesion effects, R1277  
Substance P, magnesium deficiency and, R734  
Substrates, oxidation, metabolic and respiratory effects, R1271  
Suckling, macromolecular transport, synthetic trypsin inhibitor effects, intestine, R996  
Sugar, transport, intestinal, maintenance during hibernation, R517  
Suprachiasmatic nucleus  
absence of, daily torpor (hamster), R353  
circadian rhythms, feeding schedules and (hamster), R116  
isoperiodic neuronal activity in, R51  
Supraoptic nucleus  
A1 neurons projecting into, chemoreceptor and baroreceptor responses, R310  
neurons, depolarization, angiotensin II receptors and, R1333

**Swallowing, respiration and, coordination of**, R624  
**Sweating, exercise thermoregulation, hydration state effects (goat)**, R201  
**Swimming: see Exercise**  
**Sympathetic nerve activity**  
 arterial baroreflex dynamics, hypertension, R524  
 baroreflex control of, CGRP effects, R874  
 converting enzyme inhibitor effects, spontaneous hypertension, R109  
 discharge, forced oscillations in, R564  
 glucose transport system, ventromedial hypothalamic stimulation effects, R1228  
 influence on renal function and arterial pressure, spinal transection, R1265  
 regional discharge, splanchnic nerve response, R437  
**renal**  
 arterial pressure lability and, R639  
 vasopressin and, R1187  
**Sympathetic nervous system innervation, brown adipocyte proliferation and**, R1176  
**renal responses, ANP-mediated volume depletion and**, R1303  
**sympathoexcitation, midbrain central gray and**, R24  
**Sympathetic responses, forebrain, medullary relay of**, R544  
**Sympathoexcitation, midbrain central gray and**, R24  
**Synaptic depression, during anoxia, cerebellum (turtle)**, R1057  
**Syncope, head-up tilt, pituitary-adrenal responses to**, R156

**T**

**Taste: see Gustatory response**  
**Temperature**  
 ambient, hypoxia and, effects on gaseous metabolism, newborn, R267  
 dependence, electrophysiological properties of myocytes (guinea pig, squirrel), R177  
**regulation**  
 delayed firing rate and, diencephalon, R679  
 loci and roles of acetylcholine in (goldfish), R596  
 neural networks and, diencephalon, R670  
**Temperature, body**  
 absence of suprachiasmatic nucleus, daily torpor (hamster), R353  
 adrenergic receptors and, R915  
 blood, exercise thermoregulation effects (goat), R201  
 brain, sleep and sleep deprivation, R1078  
 CCK reduction of, capsaicin effects, R1215  
 high-intensity light, circadian adaptation and, R428  
 hypoxia and, effects on gaseous metabolism, newborn, R267  
 LPS fever, interleukin-1 suppression of, R653  
 Tendon, torque profile and, hip joint (frog), R586  
**Testicles, endothelin-1-specific receptors in**, R15

**Thermogenesis**  
 brown fat, strain differences in rats, R59  
 nonshivering  
 protein synthesis, brown fat, R1003  
 reproductive function and, R820  
 responses to isoproterenol,  $\beta$ -adrenergic antagonists and, R915  
**Thermoregulation**  
 behavioral, loci and roles of acetylcholine in (goldfish), R596  
 central vasopressin, regulation of fever in bacterial infections and, R1235  
 cold tolerance, reproductive function and, R820  
 exercise, hydration state effects (goat), R201  
 gaseous metabolism, hypoxia and ambient temperature effects, newborn, R267  
 responses to isoproterenol,  $\beta$ -adrenergic antagonists and, R915  
 TNF- $\beta$  induction, sleep, fever, anorexia and, R703, R708  
**Thiols, stimulation, glutathione synthesis**, R348  
**Thirst: see Drinking**  
**Thymidine, sympathetic innervation, brown adipocyte proliferation and**, R1176  
**Torpor, suprachiasmatic nucleus and (hamster)**, R353  
**Torque profile, hip, determinants (frog)**, R586  
**Transferrin, degradation, iron uptake relations, brain**, R924  
**Triacylglycerols, linoleic acid-enriched, retention, liver and serum during fasting**, R233  
**Trigeminal nerve, stimulation, chemoreceptor drive and**, R1049  
**Trypsin inhibitor, synthetic, cessation of macromolecular transport and, suckling**, R996  
**Tumor necrosis factor- $\alpha$ , systemic injection, interleukin-1 $\beta$  and LPS fever**, R987  
**Tumor necrosis factor- $\beta$ , sleep, fever, anorexia and**, R703, R708  
  
**U**  
**Urinary bladder, obstructed, detrusor hyperplasia in (guinea pig)**, R1284  
**Urinary clearance, ANP effects, vasopressin metabolism**, R273  
**Urinary output, arterial pressure relations, pregnancy and (sheep)**, R1141  
**Urine, concentration and dilution, kinin receptor antagonist effects**, R1136  
**Uterus, blood flow: see Blood flow**  
  
**V**  
**Vagotomy**  
 duodenal preabsorptive origin, gustatory alliesthesia, R1013  
 intragastric copper sulfate effects (ferret), R284  
 satiation and, CCK, R1354  
**Vagus nerve**  
 abdominal, mediation of CCK satiation effects, R1354  
 baroreflex reproducibility, R215  
 CCK-A and CCK-B, gastrin receptors with, R591  
 input, central processing of, periodic lung inflation, R292  
 near-celiac CCK, satiety and, R572  
**Vascular response, differential regional, hypoxia, EDRF effects**, R45  
**Vas deferens, neural regulation of, electrophysiological analysis**, R331  
**Vasoconstriction, hypoxia-induced, EDRF effects**, R45  
**Vasomotor responses, adrenergic, nasal mucosa (seal)**, R1291  
**Vasopressin: see also Antidiuretic hormone**  
 ACTH responses and, response to hypoglycemia, awake state, R382  
 age and blood pressure effects, response to hypoxia, fetus (sheep), R880  
 arginine, response to hemorrhage and hypoxia, R664  
 central, regulation of fever in bacterial infection, R1235  
 central control of, sex differences, R1030  
 cerebrovascular regulation and, fetus, R376  
 circulating, modulation of cardiovascular responses to exercise, R1104  
 input to A1 neurons, projecting into supraoptic nucleus, R310  
 metabolism, ANP effects, kidney, R273  
 nucleus tractus solitarius, sinoaortic deactivation and, R258  
 plasma, carotid baroreflexes and, during head-up tilt, R318  
 reflex regulation and  
 ACTH, glucocorticoids, and renin, R762  
 heart rate, R756  
 secretion, right atrial receptor control of, R1071  
 sodium chloride inhibition, gastric motility and food intake, R9  
 suppression of renal sympathetic outflow, baroafferent inputs and, R1187  
**Venoconstriction, pulmonary, anaphylaxis and**, R1024  
**Ventilation, alveolar, sodium acetate and**, R1271  
**Ventralateral medulla**  
 renal afferent input to, R412  
 supraoptic nucleus, A1 neurons projecting into, inputs to, R310  
**Ventralateral pons, stimulation, splanchnic nerve response**, R437  
**Verapamil, diverse effects, glucose transport, skeletal muscle**, R70  
**Volume**  
 blood, determination, microsphere and dilution techniques for, R728  
 bolus, respiration and swallowing, R624  
 betaine transport, gill (mussel), R226  
 regulation, calcium in, proximal tubule cells, R1086  
 depletion, ANP-mediated, renal responses and, R1303  
 expansion, renal responses to, kinin receptor antagonist effects, R1136  
 microvascular, ANP infusion effects on albumin transport, R945  
**Vomiting, fictive, respiratory nerve activity during**, R335  
  
**W**  
**Water**  
 deprivation  
 vasopressin and angiotensin II control

SUBJECT INDEX TO VOLUME 32

R1369

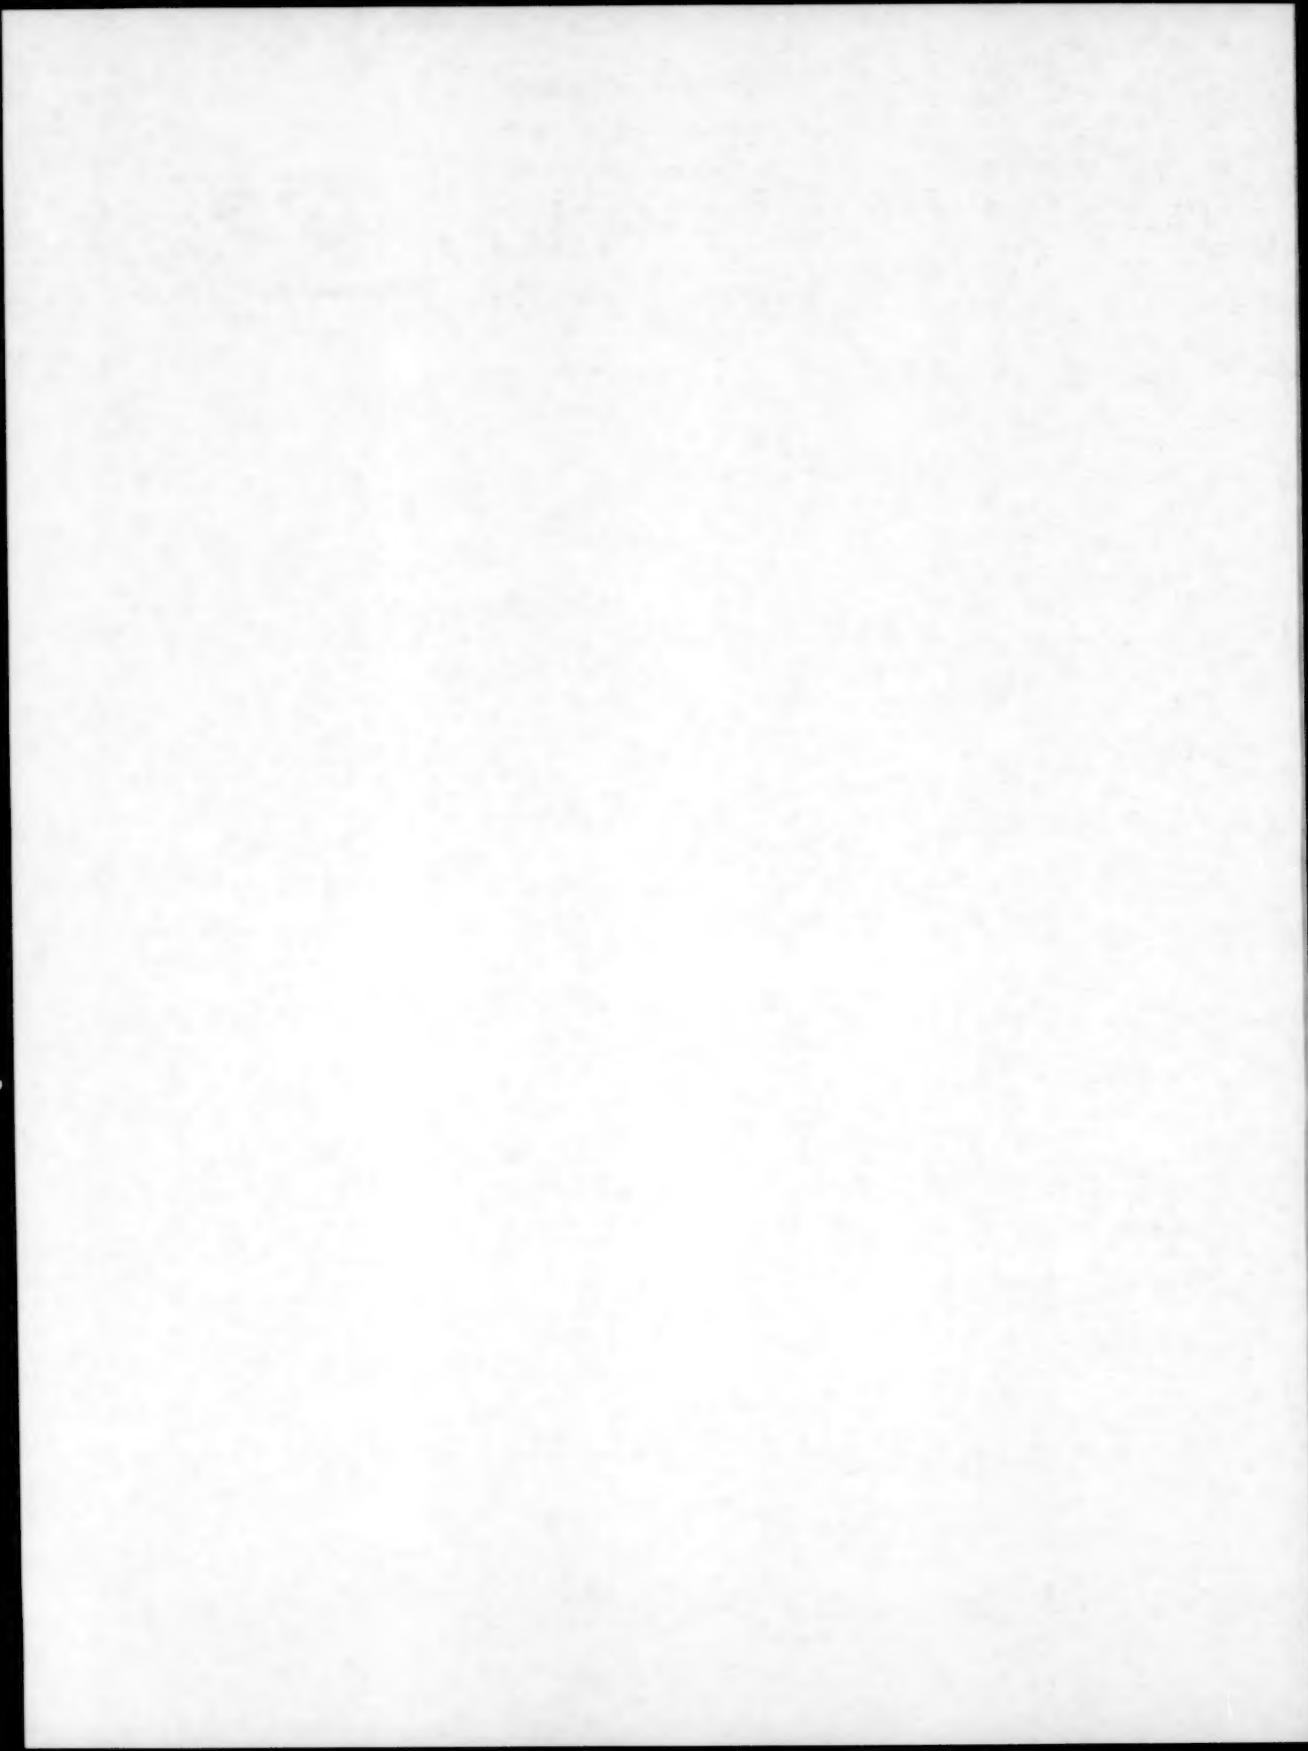

of heart rate and, R756  
vasopressin and angiotensin control of  
ACTH, glucocorticoids, and renin,  
R762  
doubly labeled, underfeeding and body  
weight regulation, R251  
excretion, diltiazem effects, medullary,  
R1064

extravascular, ANP infusion effects on  
albumin transport, R945  
flow, nasal, cardiovascular responses,  
R1049  
intake, cholinergic activation of subforn-  
ical organ, AV3V lesion and, R1277  
Wax ester, assimilation, physiological cor-  
relates of, R464

Weight  
body  
loss, intrahypothalamic metallopor-  
phyrins and, R805  
reversal of high-fat diet-induced obe-  
sity, female, R790

Z

Zinc, metabolism, aging changes, R1162
